

Super Duper Wrap

Permanent/Emergency Repair Tape

SUPER DUPER WRAP is a self-fusing silicone tape. Lab tested a 950PS (compared to Mil spec standard of 700 psi). **SUPER DUPER WRAP** is the strongest and fastest-fusing self-fusing silicone repair tape on the market today. **SUPER DUPER WRAP** insulates up to 8,000 volts per layer, withstands 500°F of heat, and it remains flexible to -85°F. Also it is a permanent air-tight, water-tight seal in seconds. Never gets gummy or sticky like electrical or duct tape. It's extremely versatile, it resists fuels, oils, acids, solvents, salt water, road salt, and UV Rays.

Directions: Wrap **SUPER DUPER WRAP** around area to be repaired by stretching and overlapping onto itself as you wrap. For best results - stretch tape at least twice the original size. A tighter wrap produces a faster, better bond. Continue to wrap around area to be repaired by overlapping **SUPER DUPER WRAP** onto itself so that 1/2 the width is covered with each new wrap. The first and last wrap should completely overlap for the best bond. Most repairs will require 3-5 layers, and must be wrapped 3-5 inches on either side of the repair. **SUPER DUPER WRAP** is not reusable, but additional tape can be added to an area at any time.

Health	0
Flammability	0
Physical Hazard	0
Protection	N/A

Areas of Use:

- *HVAC
- *Hospitals
- *Apartments
- *School Districts
- *Plumbing
- *Amusement Parks
- *Hotels
- *Maintenance Departments

Appearance and odor.....	Wax like solid, odor not determined.
Specific Gravity.....	1.17 - 1.23 (25°C)
