

Super Wrap

Self-Fusing Silicone Tape/Insulation Wrap

SUPER WRAP is a self-fusing silicone repair wrap that has numerous applications and is a must have for any tool box, glove box, or maintenance shop. It is versatile and easy to use, with no sticky residue. **SUPER WRAP** creates a permanent air-tight, water-tight seal in seconds. Can be used to repair leaks on pipes and hoses, for electrical wiring or as shrink-wrap, use to wrap tool handles for better grip, replace old sticky electrical tape, protect metal fittings from corrosion, and so much more! You can wrap it around anything you want secure, and it will not leave any sticky residue like duct or electrical tape. **SUPER WRAP** resists to oil, fuel, acids, solvent, salt water, and UV rays. It withstands 700 PSI and 500° of heat, plus it insulates up to 8000 Volts (per unstretched layer). Its high thermal conductivity allows for use wherever a tough, high temperature, permanent insulation or seal is needed. Operating temperature ranges from: -50°F to 500°F. **SUPER WRAP** can be stretched 300%, and cures at room temperature with no tools needed. **Available in Red, Clear, Black, Blue, Purple, Green, Orange, Brown, and Yellow.**

Directions: Wrap **SUPER WRAP** around area to be repaired by stretching and overlapping onto itself as you wrap. For best results - stretch tape at least twice the original size. A tighter wrap produces a faster, better bond. Continue to wrap around area to be repaired by overlapping **SUPER WRAP** onto itself so that 1/2 the width is covered with each new wrap. The first and last wrap should completely overlap for the best bond. Most repairs will require 3-5 layers, and must be wrapped 3-5 inches on either side of the repair. **SUPER WRAP** is not reusable, but additional tape can be added to an area at any time.

Areas of Use:

- *Apartment Complexes
- *Maintenance Departments
- *Electrical Shop
- *HVAC
- *Hotels
- *Plumbing Departments
- *Automotive
- *Parks & Recreations
- *Hospitals
- *School Districts
- *Amusement Parks
- *Cities & Counties

Health	-
Flammability	-
Physical Hazard	-
Protection	-

Appearance and odor.....	Colored silicone tape, No odor.
Specific Gravity.....	1.17 - 1.23 (25°C)
% Volatile (by Volume).....	N/A
