

# ABSORB BULK

Absorbs on Contact

**ABSORB BULK** is a solid, granular super absorbent Polymer. This cross-linked polyacrylate material swells and absorbs many times its weight in aqueous solutions. **ABSORB BULK** has been engineered to absorb under pressure and has properties that make it ideally suited for the absorption and solidification of low level radioactive waste (LLRW) and other types of waste sludges. **ABSORB BULK** has the ability to both absorb under pressure and to retain absorbed liquids at high pressures:

At 25X Hydration, PASSES at 50 psi

At 10X Hydration, PASSES at 75 psi

Bulk Density = 4.5 to 6.5 lbs/gallon

Health	1
Flammability	1
Physical Hazard	0
Protection	-

#### Areas of Use:

- \*Wastewater Facilities
- \*Cities & Counties
- \*Apartment Complexes
- \*Sanitation Departments
- \*Schools
- \*Hospitals

Appearance & Odor.....	White granular powder
Specific Gravity.....	0.4 to 0.7 g/cc
Net Contents.....	6 Gallons
