

ALUMINUM BRITE

Aluminum Cleaner

ALUMINUM BRITE is an excellent ground transportation aluminum brightener. **ALUMINUM BRITE** cleans and brightens aluminum parts, removes anodic or chromate coating and cleans aluminum vans and trucks. This acidic liquid designed for use as an aluminum deoxidizer with a pH of less than one and will not etch most metals. This product is non-flammable and non-explosive.

DIRECTIONS

For truck and van cleaning, dilute with one to forty parts of water. The solution may be either brushed or sprayed on and allowed to dwell until a foam blanket occurs. The surface should be water rinsed and, in some instances, it is required to agitate the surface prior to rinsing. This depends, however, entirely on the aluminum alloy which is being brightened. Some alloys do not require brushing before final rinsing. The surface being cleaned should be worked from the bottom up, keeping the surface wet.

Health	3
Flammability	0
Physical Hazard	1
Protection	B

Areas of Use:

- *Cities & Counties
- *Fleet Departments
- *Vehicle Dealerships

Appearance & Odor.....	Green liquid with acidic odor
Relative Density.....	1.01
Net Contents.....	5 Gallons
