

# BATTERY CLEANING WIPES

## Color Performance Indicator

**BATTERY CLEANING WIPES** are a convenient one-step solution to battery terminal corrosion removal and acid neutralization. Our heavy-duty cleaning wipes are saturated with an effective, heavy-duty cleaner that removes grease and grime from battery casings and terminals. Our formula not only cleans the battery but also neutralizes any battery acid present. **BATTERY CLEANING WIPES** contain a unique color indicator that turns red in the presence of acid, then changes back to orange when the acid is neutralized. **BATTERY CLEANING WIPES** leave behind a residual film that provides short term corrosion resistance. Helps eliminate power leaks and aids in restoring full starting power. Features a low odor, water-washable formula.

**FOR USE ON** Fleet Cars, Trucks, Buses, Taxi Fleets, Forklifts, Construction, Agricultural and Marine Equipment, Aircraft, Golf Carts, Postal Vehicles, Industrial Battery Backup Systems.

### DIRECTIONS:

#### WEAR GLOVES WHEN USING PRODUCT.

Be sure cell covers are tightly sealed. Wipe down and clean cables, clamps, terminals, brackets, housings and entire battery surface. **Battery Cleaning Wipes** will start out light orange and turn red in the presence of acid. Allow product to work for several minutes, then wipe off or flush with water. Follow with a second application. If solution still turns red, acid neutralization process is not complete. Allow to set then repeat. For heavy deposits, agitation with a wire brush may be needed. If wipe remains yellow then all surface acid has been neutralized. Allow product to dry and form residual protective film.

#### Areas of Use:

- \*Automotive
- \*School Bus Transportation Dept.
- \*Fleet Maintenance
- \*Golf Course
- \*Amusement Parks

Appearance & Odor.....	Light orange polyester wipe with a bland odor
Specific Gravity (H2O=1).....	0.9
Net Contents.....	100 pre-moistened towels 7.25"x7.25"
