

BUGS IN A SACK

Continuous Flow Sewer System Maintainer

BUGS IN A SACK is an innovative dispersal design. The powdered bacteria & enzyme mixture is packaged in a muslin sack with a 20 foot drop cord and clip. This allows for easy suspension in a lift station, manhole or grease trap. **BUGS IN A SACK** contains a powerful formulated blend of microorganisms, micro nutrients, and enzyme developed for use in bio-augmentation. These safe, non-pathogenic microbes produce a broad spectrum of effective enzyme systems which degrade organics such as starches, carbohydrates, proteins, animal and vegetable fats, oils, and grease in waste streams. **BUGS IN A SACK** has multiple strains of bacteria to enhance waste water biology and create a stable micro-ecosystem for excellent performance. Micro nutrients and growth stimulants are blended with the product to ensure rapid establishment in thriving colonies of waste degrading microbes in waste streams, WWTPs, plumbing, grease traps, drains and septic systems. The diversity of the bacterial & enzyme systems make this an excellent product!

AREAS OF USE
Municipal & Industrial Sewage Systems • Lift Stations
Sewer Lines • Grease Traps • Septic Systems

BENEFITS
Digests Waste • Digests Grease & Fat • Digests Proteins, Starches & Carbohydrates
Breaks down Soap & Surfactants • Reduces or Eliminates Odors at their Source
Reduces Sludge • Cool Effect • Non-Toxic
Non-Hazardous • Non-Corrosive

DIRECTIONS
Hang sack into water flow and tie off drop-cord securely to prevent the sack from getting entangled in the pumping mechanism or blocking the water flow. Product is released over time, depending on water flow. **BUGS IN A SACK** eliminates fats, oils & grease along with the associated foul odors. When sack is empty simply dispose of the empty sack and replace.

PRECAUTIONARY STATEMENT
Never give anything by mouth to an unconscious person. If you feel unwell, seek medical advice before the label when available. After Skin Contact: Remove affected clothing and wash all water from skin with mild soap and water. Substituted by warm water. After Eye Contact: Flush immediately with plenty of water. Obtain medical attention if pain, burning or redness occurs. After Ingestion: Do not induce vomiting. Do NOT induce vomiting. Obtain emergency medical attention.

PRECAUTIONS FOR SAFE HANDLING
Wash hands and other exposed areas with mild soap and water before eating, drinking or smoking and when leaving work. Provide good ventilation in process area to prevent formation of dust.

KEEP OUT OF REACH OF CHILDREN
