

DRAIN OXY

Hydrogen Peroxide
Drain Opener & Maintainer

- Eliminates Organic Odors From Drain Lines
- Devours Buildups Of Fats, Oils, Grease, (FOG)
- Clears Bodily Fluids, Blood, Cellulite in Drain Lines
- Devours Sugars, Syrups And Slime
- Increases Dissolved Oxygen In Waste Water
- Scavenges Hydrogen Sulfide, Preventing Corrosion & "Rotten-Egg" Smell
- Biodegradable, Non-flammable, & Non-corrosive.

DRAIN OXY is a powerful, natural, non-corrosive drain cleaner formulated specifically for use in kitchen drains, grease traps, lift stations, and surgical drains.

RECOMMENDED APPLICATION

DRAIN OXY is ideally suited to remove heavy buildups in drain lines and grease traps. **DRAIN OXY** is non-caustic and non-acid and can be used in any drain or trap to provide a deep cleaning prior to starting a drain or grease trap maintenance program. Great for maintaining surgical drains where blood, cellulite, and other bodily fluids are often a source of clogs and slow drains.

DIRECTIONS

DRAINS & GREASE TRAPS: Slowly add **Drain Oxy** to each drain opening, starting with those located on lower floors or closest to the grease trap then progress adding to the drains up the line. One or more Quarts per drain may be required to completely remove existing buildups. Be careful as **DRAIN OXY** may produce foam during the cleaning process and this foam may come up through floor drains or vents. Drain boots and drain covers may be used to prevent this from occurring. Foam can be rinsed back into the drain easily after application. If fumes are produced during the application, add cold water to slow down the cleaning process and to eliminate the fumes. After initial clean out, add 6-12 ounces of **DRAIN OXY** per day as preventative maintenance.

SODA FOUNTAINS, ICE MACHINES, & WATER FOUNTAIN DRAINS: Add one quart to remove all of the existing build up and then add 1 quart weekly to prevent buildup.
