

DUST MOP TREATMENT

Oil-Based Formula

DUST MOP TREATMENT is an oil-based treatment that quickly attracts dust and dirt to mops, cloths, and mitts. **DUST MOP TREATMENT** eliminates the annoyance of flying dust, reduces possible inhalation and prevents resettling. **DUST MOP TREATMENT** contains special ingredients that convert dust into heavy lint, which shakes out or can be washed out easily. A routine treatment program will extend the life of the floor finish and help maintain the gloss.

DIRECTIONS

Hold can upright 6" to 8" from mop or cloth. Spray a light mist directly on mop or cloth. Allow treatment to penetrate. Dust or mop as usual. Re-apply as needed. For best results, treat dust mops overnight. When saturated, shake out and clean mop, cloth or mitt in washing machine. Retreat after washing.
