

GRAFFITI GUARD

Graffiti Protection Barrier

GRAFFITI GUARD is a clear liquid that can be applied to nearly any non-porous surface to provide a protective barrier against graffiti. After **GRAFFITI GUARD** is applied, it dries to a clear film which protects against spray paint, marker, pen, and other substances. Once defaced, the barrier is easily removed with no damage to the surface. The thickened formula adheres to vertical surfaces, and is water-resistant, allowing for outdoor applications. It will not affect signs' reflective properties, and will not discolor.

DIRECTIONS

Mix well before using. Using a roller or paint brush, apply a layer onto a clean, non-porous surface and allow to dry to a clear film "barrier". On vertical surfaces, rolling may be preferred over brushing in order to prevent the product from running. Start at the bottom and work up.

Allow up to 1 hour dry time. If the barrier becomes defaced, simply remove the film by peeling or with a water rinse with agitation. Reapply a new barrier once the surface has dried. Not for use on wood, painted, and other porous surfaces. Intended for use on enameled, powder coated, electroplated, and solid plastic surfaces. In exterior application, the barrier may wash away under extended or heavy rain.
