

H2O-LESS DEODORIZER

Lavender Deodorizer for
Waterless Urinals

Water conservation has become a main concern for many facilities and waterless urinals are helping save millions of gallons of water, but keeping them fresh presents another issue. Keep the urinals at your facility fresh smelling with Omega's **H2O-LESS DEODORIZER**. This long lasting deodorizer is designed to keep waterless urinals fresh and clean smelling. **H2O-LESS DEODORIZER** will not evaporate out of the drain line so it remains for extended periods of time, expending only small amounts each time the urinal is used so it lasts for approximately 1200+ uses. With the portion control device, refilling the trap is easy and waste is minimized. Simply squeeze the bottle, then pour in the pre-measured amount and you're done! For best results keep the urinal clean and sanitized with Omega's **H2O-LESS URINAL AND LINE CLEANER** which may be used in the urinal without harming the **H2O-LESS DEODORIZER** in the trap. **H2O-LESS DEODORIZER** is environmentally friendly and biodegradable!

DIRECTIONS

H2O-LESS DEODORIZER comes equipped with a 3 ounce portion control device (upon request P9201) for easy dispensing. Screw the portion control device onto the pint bottle. Squeeze the bottle to measure out the correct amount (3 oz. per application), then pour it into the trap toward the back of the urinal.
