

MEGA BAC CITRUS

Bacterial Drain Maintenance & Deodorizer

MEGA BAC CITRUS is a convenient liquid form of living bacteria in suspension to promote the decomposition of organic matter without the use of acids, caustics or solvents. When used in drain lines and grease traps it effectively prevents build-up of grease and organic matter which cause clogs and odors. **MEGA BAC CITRUS** may be used as a deodorizer in bathrooms, trash chutes, dumpsters, drain lines, grease traps, septic tanks, holding tanks, carpets, and around urinals. The anaerobic and aerobic bacteria in **MEGA BAC CITRUS** have been cultured specifically for their ability to digest waste quickly and effectively thus speeding up the normal "breakdown" process. The bacteria quickly and effectively controls odors anywhere, even pet odors in carpet and sewage odors from overflow.

DIRECTIONS

DRAIN LINES: Pour 3-4 ounces down each drain 2-3 times per week. For best results use at the end of the day to allow the bacteria to work. **GREASE TRAPS:** Pour 8 ounces of **MEGA BAC CITRUS** 180 gallons of capacity directly into trap. Follow with 1 cup of lukewarm water. Daily use is recommended. **SEPTIC TANKS:** Use 1 pint of **MEGA BAC CITRUS** per 200 gallons of capacity. Thereafter use 8 ounces weekly. **HOLDING TANKS:** Add 2 ounces of **MEGA BAC CITRUS** per gallon of water in holding tank. Thereafter use 1 ounce per gallon of water. Repeat after every clean-out. **DEODORIZING:** Mist surface completely using a trigger sprayer starting from the top and working down. **EXTRACTING MACHINES:** Use 1-2 oz. per gallon of water to help reduce mold, mildew and musty odors.
