

# NO SWEAT

Prevents Condensation And Sweating Of Cold Surfaces

**NO SWEAT** is a convenient, ready-to-use spray-on pipe insulator. Dries to a hard white coating which can be painted or primed when dry. Prevents sweating and dripping on cold water pipes, refrigeration lines, condensers, air conditioning lines, and other cold surfaces. **NO SWEAT** insulates water tanks, metal gutters, ducts and toilet tanks. Fan spray application provides an excellent method of repairing wrap around type insulation. Easy to apply to hard to reach areas. Expanding spray conforms to irregularly shaped surfaces.

### DIRECTIONS

Remove dust and loose dirt from surface to be sprayed by wiping with clean, dry cloth. Cover surfaces under area to be treated to avoid overspray. Shake can vigorously. Continue shaking for one minute and occasionally during use. For proper adhesion apply only to dry surfaces. Hold can 8-10" from surface. Apply with a sweeping motion using several thin coats. Allow each coat to dry thoroughly for several minutes before applying a new coat. If product runs, can is too close to surface.

Health	2
Flammability	2
Physical Hazard	0
Protection	B

### Areas of Use:

- \*Cold Water Pipes
- \*Cold Air Ducts
- \*Industrial Application
- \*Condenser Lines
- \*Hospitals
- \*Cold Storage Lockers
- \*Restaurants

Appearance & Odor.....	Clear liquid with chlorinated solvent odor
Relative Density (H2O=1).....	1.2 @ 77°F (25°C)
Net Contents.....	15 OZ
