

SAN CLEAN

Foaming Germicidal Cleaner

SAN CLEAN has been designed specifically for Homes, Nursing Homes, Hospitals, Institutions, Offices, Schools, Motels and Hotels. When used as directed, **SAN CLEAN** is formulated to disinfect inanimate hard surfaces (such as walls, sink tops, tables, chairs, telephones, bathrooms, shower stalls, bathtubs, hampers, cabinets and bed springs). In addition, **SAN CLEAN** deodorizes those areas which generally are hard to keep fresh smelling (such as garbage storage areas, empty garbage bins and cans, restrooms, shower stalls and other areas which are prone to odors caused by microorganisms). When used as directed, **SAN CLEAN** demonstrates effective disinfection against Staphylococcus aureus, Methicillin Resistant Staphylococcus aureus (MRSA), Salmonella enterica, Pseudomonas aeruginosa, Canine Parvovirus, Herpes simplex type 1, Herpes simplex type 2, Legionella pneumophila, and Influenza A H1N1, thus meeting requirements for hospital use. Efficacy tests have demonstrated that the product is an effective one-step cleaner disinfectant in the presence of organic soil (5% blood serum). **SAN CLEAN** is fungicidal against Pathogenic fungi (T. mentagrophytes), when used as directed on hard surfaces found in the bathroom, shower stall, and locker room, or other clean, hard, non-porous surfaces commonly contacted by bare feet. **SAN CLEAN** is a versatile disinfectant and virucide for veterinarian and animal care applications when used as directed below. **SAN CLEAN** can be used in Veterinary clinics, animal life science laboratories, kennels, dog/cat animal kennels, breeding and grooming establishments, pet animal quarters, zoos, pet shops, tack shops and other animal care facilities. **MOLD AND MILDEWSTAT: SAN CLEAN** controls mold, mildew and the odors they cause on hard, non-porous, inanimate surfaces when used as directed.

DIRECTIONS

It is a violation of Federal law to use **SAN CLEAN** in a manner inconsistent with its labeling.

DISINFECTION, DEODORIZATION AND CLEANING: SAN CLEAN is not to be used as a terminal sterilant/high level disinfectant on any surface or instrument that (1) is introduced directly into the human body, either into or in contact with the bloodstream or normally sterile areas of the body, or (2) contacts intact mucous membranes but which does not ordinarily penetrate the blood barrier or otherwise enter normally sterile areas of the body. **SAN CLEAN** may be used to pre-clean or decontaminate critical or semi-critical medical devices prior to sterilization or high level disinfection. Surfaces which come into contact with food must be rinsed with potable water after disinfection. Do not use this product to disinfect appliances, refrigerator interiors, microwave

interiors. Do not use **SAN CLEAN** to disinfect or clean dishes, glassware or eating utensils. **To disinfect hard non-porous surfaces (such as glazed bathroom tiles, walls, fixtures, shower stalls, sinks, bathtubs, hampers, tables, chairs, HVAC catch-pans and air conditioning evaporator coils), proceed as indicated:** (1) Shake can before using. (2) Hold six to eight inches from surface to be treated. (3) Spray area until it is covered with a white foam. Allow foam to penetrate and remain wet for 10 minutes. No scrubbing necessary. (4) Wipe off with a clean cloth, mop or sponge. **SAN CLEAN** will not leave grit or soap scum. For heavily soiled areas, remove gross soil before treatment.

For animal quarters and kennels, veterinary clinics, animal life science laboratories, pet shops, kennels, breeding and grooming establishments, tack shops: Remove all animals, poultry, and their feed/food from premises. Remove all litter, droppings and manure from all surfaces to be treated. Apply this product as directed above. **SAN CLEAN** will disinfect and clean the following surfaces: Equipment, utensils, instruments, cages, kennels, stables, stalls and catteries. After disinfection, ventilate buildings, coops and other closed spaces. Do not house poultry, or other animals or employ equipment until treatment has been absorbed, set or dried. All treated equipment that will contact feed or drinking water (racks, troughs, automatic feeders, fountains, waterers and other similar equipment) must be thoroughly scrubbed with soap or detergent then rinsed with potable water before reuse.
