

TERMINATOR POWDER

Fire Ant & Roach Terminator

TERMINATOR POWDER insecticide sucks the life out of fire ants and other insects by literally draining them of their moisture. Just sprinkle **TERMINATOR POWDER** on or around ant hills and other entrances, as soon as they track through it, the active ingredient silicon dioxide immediately begins to “suck” valuable moisture from their bodies. Best of all, if the insects are able to crawl back into the nest, the powder continues to cling to their bodies and contaminates the rest of the colony. **TERMINATOR POWDER** Works up to 6 months after application.
