Wasp & Hornet Killer

NEW & IMPROVED FORMULA

- **KILLS WASPS, HORNETS, YELLOW JACKETS & BEES ON CONTACT**
- **KILLS WITH RESIDUAL ACTION AS WASPS & HORNETS RETURN TO NEST**
- **JET SPRAY - WILL REACH NESTS UP TO 20 FEET ABOVE GROUND**
- **DIELECTRIC BREAKDOWN VOLTAGE OF 47,300 VOLTS**

DIRECTIONS:

For spot, crack, and crevice application only. Other than application to building foundations, all outdoor applications to impervious surfaces such as sidewalks, driveways, patios, porches and structural surfaces (such as windows, doors and eaves) must be limited to spot or crack and crevice treatments only, except for the following permitted uses: Treatment to soil or vegetation around structures; Applications to lawns, turf, and other vegetation; Applications to building foundations, up to a maximum height of 3 feet.

For best results, spray in early morning or late evening when insect activity is minimal. Stand a safe distance from nest and not directly underneath. Remove protective cap. Hold can upright and point spray opening toward nest with wind at your back. Spray until nest is thoroughly saturated to kill the entire nest population. Residual action will kill Wasps and Hornets returning to the nest. Wait at least 24 hours before removing the nest.

To kill Wasps, Hornets, Yellow Jackets and Bees under eaves, screens, window frames, doors, patios, cracks, holes or crevices wherever insects are noticed, spray for about 1 - 2 seconds or until surfaces are moist. To prevent entrance of insects into the house, spray around points where insects can enter house; outside plumbing, faucets, and cracks or crevices in foundation as well as along sills and ledges.
