

WEATHER SEAL

Frame & Chassis
Undercoating

WEATHER SEAL is a paintable, high strength rubberized polymer blended undercoating that you can apply in your own shop with your own people. **WEATHER SEAL** helps protect your vehicles against extreme weather and chemicals used to remove ice on roadways. **WEATHER SEAL** extends the life span of your trucks, buses, cars and equipment by protecting the frame and chassis against corrosion caused by ice-melt products commonly used to keep our roadways safe and open during the winter season. These deicers melt ice and snow, but they also attack the frames and chassis components, including fuel tanks, oil pans, brake cables and wiring harnesses of your expensive public works trucks, school buses, sanitation trucks and other fleet vehicles. **WEATHER SEAL** will protect these components against these chemicals and extreme weather. **WEATHER SEAL** will help cut those costly maintenance bills and keep the older vehicles and equipment in your fleet running longer. **WEATHER SEAL** can be applied to frames, leaf springs, air brake chambers, transmission pans and oil pans.

DIRECTIONS

1. Surface must be clean and dry before painting. Protect surrounding areas from spray mist. For best results, use when can is between 50°F and 90°F (10°C and 32°C).
2. Shake can at least one minute after rattle is heard and occasionally during use.
3. Spray surface with steady even strokes at a distance of 8 to 10 inches (20 to 25cm).
4. If clogging develops, turn spray head 1/4 turn or remove and clean spray head slot. **DO NOT** stick pin or other objects into can opening. With can and spray head pointed away from you, reinsert spray head with a gentle twisting motion.
5. To clear spray head for future use, turn can upside down and spray for 3 seconds. Completely empty cans may be recycled or disposed of with regular trash. Dispose of partially empty cans responsibly. **DO NOT** incinerate or compact.
