

Tire Shine

Tire and Bumper Dressing

TIRE SHINE is a quick, easy-to-use instant gloss spray that restores shine, body, moisture and life to dried out, dull tires and trim. Renews faded tire side walls, bumpers, rubber seals and weather stripping to like-new condition. Restores color and provides a durable, long-lasting shine. Treated surfaces are protected against harmful UV rays that can cause cracking, fading and premature aging.

Directions: Shake can before using. For best results, tire should be clean prior to treatment. Spray **TIRE SHINE** until tire is evenly covered with a light foam. Allow foam to break. Wipe tire surface until resulting shine is evenly distributed. Excess product and overspray can be removed from grooves, tight places, wheels, and fenders with a water rinse. Water will not remove the shine from the tire. After rinsing, lightly wipe surfaces dry. Repeat application to intensify gloss. No need to rinse between multiple applications; rinsing after final application is recommended. **TIRE SHINE** may also be sprayed onto a dry cloth and wiped on tires and bumper. **DO NOT** spray on vehicle control surfaces such as pedals, steering wheels, shift levers, brake disks or drums.
