

ULTRA HAND SANITIZER

80% Alcohol Antiseptic

According to the CDC, recommendations reflect the important role of hand hygiene for preventing the transmission of pathogens in healthcare settings for a wide range of pathogens. The ability of hand hygiene, including hand washing or the use of alcohol-based hand sanitizers to prevent infections is related to reductions in the number of viable pathogens that transiently contaminate the hands. Hand washing mechanically removes pathogens, while laboratory data demonstrate that 60% ethanol and 70% isopropanol, the active ingredients in CDC-recommended alcohol-based hand sanitizers, inactivates viruses that are genetically related to, and with similar physical properties as, the 2019-nCoV.

ULTRA HAND SANITIZER is a refreshing alcohol-based hand sanitizer that features an **80% alcohol formula** recommended by the World Health Organization (WHO). Instantly sanitizes hands without water or towels. **ULTRA HAND SANITIZER** leaves hands sanitized, smooth and conditioned without an antiseptic smell. Evaporates quickly. Will not dry out skin. Helps prevent bacterial transfer and reduces hospital acquired infections. Dries in 15 seconds leaving hands fresh and clean.

DIRECTIONS FOR USE:

Place enough product in your palm to thoroughly cover your hands. Rub hands together briskly until dry. Children under 6 years of age should be supervised when using this product. Store between 59°-86°F (15°-30°C). May discolor certain fabrics or surfaces.
