

BIO BLOCK

Enzyme Block with Net

BIO BLOCK is a slow dissolve solid that contains naturally occurring bacterial cultures used to digest waste and reduce obnoxious odors. **BIO BLOCK** is designed to attack waste treatment problems resulting from heavy deposits of difficult to non-biodegradable compounds such as unprocessed greases, surfactants, cellulose, hydrocarbons and phenols and is ideal for use in many applications. Releases bacteria into the water flow reducing grease and scum. **Available in 5lb and 10lb block.**

How To Use: Suspend or drop directly (without suspension net) into grease traps and lift stations. The block will disperse all bacteria within 30 - 45 days. The mesh bag is easily removed and replaced.

Areas of Use:

- *Schools
- *Cities & Counties
- *Restaurants
- *Stadiums
- *Casinos
- *Amusement Parks
- *Industrial Grease Trap/Drain Line
- *Industrial Waste Water Treatment
- *Pond Treatments
- *Septic System Rejuvenation
- *Farm Manure Pits & Lagoons
- *Waste Treatment Lagoons and Basins

Health	3
Flammability	3
Physical Hazard	1
Protection	0

Appearance & Odor.....	Green solid candle-like object with faint chemical odor
Net Contents.....	5 lbs, 10lbs
