

Formula 86'D

Drain Opener, Maintainer, and Sewer Solvent

This granular product is designed to remove fat and grease deposits in sewer and drain lines. The powerful chemical solvent in **FORMULA 86'D** is augmented by its catalytic and penetrating action. Other drain openers may generate heat, but will quickly cool down allowing grease and sludge to re-solidify. **FORMULA 86'D** has aluminum chips to absorb heat and distribute it evenly thereby making the product perform for longer periods and improve effectiveness farther down the drain line. **FORMULA 86'D** can be used on a regular preventive maintenance schedule to prevent buildup. For garbage disposal maintenance and grease clogs, use Omega's **NATURAL WAY** drain maintainer and degreaser.

Directions: FOR SMALL DRAINS: Remove any standing water and pour 1 ounce of **FORMULA 86'D** into drain, add 1 cup of cold water. Wait 15 minutes then flush drain with cold water. FOR FLOOR DRAINS: Increase dosage to 3 ounces and 3 cups of cold water. FOR MAIN LINES: 4" to 8" in diameter, use entire container. This will help remove feeder roots without damage to the tree. Not recommended for use in toilets, dishwashers, garbage disposals, or appliances.

Areas of Use:

- *Municipalities
- *Plumbers
- *Sewer departments
- *Apartments
- *Casinos
- *Amusement parks
- *Theatres

Health	4
Flammability	1
